Hiring Team

IntelleQAcademy

Subject: Application for 3-Month Web Development Internship

Dear Hiring Manager and Selection Team,

I am writing to express my strong interest in the **Web Development Internship** position at **IntelleQAcademy**. As a Computer Science undergraduate at Seacom Engineering College (SEC), Howrah, with a solid grounding in front-end and back-end web development, I strongly resonate with IntelleQAcademy's mission to bridge the gap between academic learning and industry demands. I am excited about the opportunity to contribute to real-world projects while collaborating with and learning from your technical team.

My technical background covers both core web fundamentals and modern back-end frameworks. On the front end, I am proficient with HTML, CSS, and JavaScript, along with state management patterns using React Context and Redux Toolkit. On the back end, I have hands-on experience designing and building RESTful Web APIs using Fast API and Python . paired with robust database integration across SQL Server, PostgreSQL, and MySQL.

Beyond theoretical knowledge, I focus heavily on practical application, debugging, and understanding systems under the hood. For instance, during a hackathon project, I engineered *NarrativeGuard*—a multi-agent verification workflow using n8n that required resolving complex API authentication flows and race conditions. This experience deepened my understanding of system integration, error handling, and structured debugging—skills that directly align with your requirements for code testing, troubleshooting, and module development.

I am an eager learner who thrives in collaborative settings, welcomes code reviews, and takes initiative when exploring new technologies and best practices. I am fully prepared to dedicate myself to the 3-month internship duration and contribute effectively to your project deadlines.

Thank you for considering my application. I would welcome the opportunity to discuss how my skills and commitment to growth make me a great fit for the Web Development team at IntelleQAcademy.

Sincerely,

Subhankar Khatua
